FDA COMPLIANCE STATEMENT

Garlock Style 7910

This is to inform that Garlock Style 7910 Sealing Components are produced from woven fabric with yarns containing a glass filament core with a jacket of Meta-aramid fibers; that has been saturated with Polytetrafluoroethylene Dispersion; then molded and sintered.

The sintered Polytetrafluorethylene (PTFE) Dispersion conforms to U.S. Federal Food and Drug Administration's (FDA) Regulation 21 CFR 177.1550. This regulation covers Perfluorocarbon Resins intended for Food Contact Applications.

A handwritten signature in black ink, appearing to read "McNally", written over the printed name.

Michael P. McNally
Senior Chemist
